

## Fluoromount-G®

Cat. No.	Format	Size
0100-01	Clear liquid mounting medium	25 mL

### Description

Fluoromount-G® is a water-soluble compound recommended for slides mounted after a staining procedure having an aqueous final step. Since Fluoromount-G® is water-soluble, the coverslip may be removed by submerging the slide in a PBS solution until the coverslip is loosened. This mounting medium also provides a semi-permanent seal for storage of slide preparations. The refractive index of Fluoromount-G® is reported to be ~1.4<sup>70</sup>.

### Applications

### Suggested Protocol

- Prepare samples and perform staining according to established procedures
- Following aqueous final step, remove excess liquid around the sample and add 1 drop (~50 µL) of Fluoromount-G® for an area of 22 x 22 mm
- Mount coverslip and remove excess mounting medium
- Allow to air dry for 5 minutes prior to analysis

### Handling and Storage

- Fluoromount-G® is supplied as a 25 mL solution containing NaN<sub>3</sub> as preservative. Store at ambient temperature.

### Warning

Contains sodium azide. Please refer to product specific SDS.
