

## BCIP/NBT One Component Membrane Substrate (Blue), Solution

Cat. No.	Format	Size
0430-01	Solution	100 mL

### Overview

<b>Technical Name</b>	5-Bromo-4-chloro-3-indolyl phosphate/nitro blue tetrazolium
<b>Reaction Product</b>	Produces an insoluble, dark blue end product upon reaction with alkaline phosphatase (AP)

### Applications

WB

### Product Use

- Ready to use formulation; dilution of the substrate is not recommended

### Handling and Storage

- Recommended storage is at 2-8°C.
- Protect from light. Reagent is stable for the period shown on the label if stored as directed.

### Warning

Reagent contains proprietary ingredients. Please refer to product specific SDS.
