**Description**

**Specificity**
Reacts with the heavy and light chains of human IgG and the light chains of human IgM and IgA

**Source**
Pooled antisera from rabbits hyperimmunized with human IgG

**Cross Adsorption**
Mouse immunoglobulins and pooled sera; may react with immunoglobulins from other species

**Purification**
Affinity chromatography on human IgG covalently linked to agarose

**Applications**

Quality tested applications include –
- ELISA ¹⁻⁶
- FLISA

Other referenced applications include –
- IHC-FS ⁷

**Working Dilutions**

**ELISA**
- AP conjugate 1:2,000 – 1:4,000
- HRP conjugate 1:4,000 – 1:8,000
- BIOT conjugate 1:5,000 – 1:20,000

**FLISA**
- FITC conjugate 1:200 – 1:400

**Other Applications**
Since applications vary, you should determine the optimum working dilution for the product that is appropriate for your specific need.
Handling and Storage

- The purified (UNLB) antibody is supplied as 1.0 mg purified immunoglobulin in 1.0 mL of borate buffered saline, pH 8.2. No preservatives or amine-containing buffer salts added. Store at 2-8°C.
- The fluorescein (FITC) conjugate is supplied as 1.0 mg in 1.0 mL PBS/NaN3. Store at 2-8°C.
- The alkaline phosphatase (AP) conjugate is supplied as 1.0 mL of stock solution in 50 mM Tris/1 mM MgCl2/50% glycerol, pH 8.0, containing NaN3 as preservative. Store at 2-8°C or long-term at -20°C.
- The horseradish peroxidase (HRP) conjugate is supplied as 1.0 mL of stock solution in 50% glycerol/50% PBS, pH 7.4. No preservative added. Store at 2-8°C or long-term at -20°C.
- The biotin (BIOT) conjugate is supplied as 1.0 mg in 2.0 mL PBS/NaN3. Store at 2-8°C.
- Protect fluorochrome-conjugated forms from light. Reagents are stable for the period shown on the label if stored as directed.

Warning

Some reagents contain sodium azide. Please refer to product specific (M)SDS.
